Agenda

Item	Discussion	Action
1 Eco Warrior Role How is your role within the classroom going? Are you facing any challenges?	Y4: We enjoy our role, but we are having problems with children still throwing things in the wrong bins. Y5: We really like having the responsibility of Eco Warrior; we are regularly checking the bins in the classroom. We also do our part at home and make sure our family are recycling properly. Y6: We are still having problems with children throwing rubbish in the wrong bins. Primrose class needs a new recycling. Thistle class needs a new bin with a lid.	<ul style="list-style-type: none"> MG to speak with MM regarding bins/recycling bins in Y6 MG to continue with weekly briefing messages to teachers to ensure they are supporting their Eco Warriors in class
2 Recycling What can we do to raise the profile of recycling?	All six children across the three year groups agreed that there is a big waste with pens when they run out as they cannot go in the normal recycling. We have decided it would be a good idea to order a pen recycling bin (one for the top floor, one for the middle floor). It would be good to do a routine or regular check of the bins as a group to monitor how the recycling is going. MG suggested that maybe Eco Warriors could pair with their year group partner to check their year's bins to ensure no one is crossing any year group bubbles. We could design new posters with more information about what can be recycled and what should go in the bin. We could make these more visually appealing to help catch children's attention. Eco Warriors to create a 'promo video' regarding recycling to help spread the message across the school safely as we cannot have assemblies.	<ul style="list-style-type: none"> MG to organise order for 2 pen recycling bins MG to look at the logistics of filming a short video Eco Warriors to continue to promote proper recycling in the classes
3 Environmental Assessment What environmentally friendly practises are already in place around the school? What can we conclude from our environmental assessment?	Some environmentally friendly aspects of our school are: -recycling bins and posters in every classroom -a garden for learning about plants, which also attracts some wildlife -scooter and bike racks to encourage We have partially completed the environmental assessment, but we will need to complete it at the next meeting. Then we will need to tally up each of the areas to help us identify which areas to focus on in our action plan.	<ul style="list-style-type: none"> Eco Warriors to complete assessment at next meeting MM to contact appropriate bodies regarding any outstanding answers to questions on the assessment
